

Managed Incident Response With Situational Awareness

In A Crisis Every Second Matters - Bring The Best-case Response To The Worst-case Scenario

In critical moments, simplicity and speed are crucial to an effective response. Employees must be empowered to direct help to where it is needed — easily and quickly — because in a crisis, every second matters.

We designed a solution that routes requests for help to key personnel instantly, with precise location and live video information. Every staff member receives a smart badge, which has only one function: to empower the wearer to quickly and discreetly activate an alert. The badge vibrates to confirm receipt of the alert.

The moment an alert is triggered, the system immediately provides clear and critical information to all impacted personnel.

CMS can engineer, install, and manage an enterprise-class networked camera and video recorder solution for your multi-camera security deployment.

CMS can add an intelligent platform that seamlessly bridges voice, video, IoT, and data communications to connect first responders when and where it matters most. Our goal is to reduce response times and time to resolution in emergencies. In both the public and private sectors reduced response times protect the lives of students, employees, worshipers, ordinary citizens, and innocent bystanders. We deliver the best interoperable communications system available today.

SIMPLE, WEARABLE DEVICE –
Equitable And 100% Adoption

INDEPENDENT OF WIFI OR CELLULAR –
Total Campus Coverage

PRECISE LOCATION INFORMATION –
Not reliant on GPS

MULTIPLE NOTIFICATION METHODS –
Notify Everyone On Campus
